

LAMPARA FRONTAL DR. KIM DOBLE LUZ LED Y LUPAS

Lenses

- Optional loupe (1.3-1.5x magnification) or telescope (2.0-2.5x) help you see clearly
- Customize your loupe based on pupillary distance (PD) and farsightedness (hyperopia).
- Attach/remove loupe/telescope without tools

Convenience

- Headlight with optional loupe shown. Pushing down the light-loupe assembly turns on the light and places the loupe in your field of view. You can select one of two downward angles, pending your preferred working position. Simply direct the light with your head.
